
THE ELDER SCROLLS : SKYRIM
SKYRIM
THE
SOUL HUNTER
"Your story begins with a soul — your soul,
and the many others you shall claim."
By ANGEL MENDEZ – AMM

Welcome,

Some of our favorite moments were made while playing video games and the games we played or still play will always be in our hearts. We try to make the best of our lives and can feel the change of every moment in time. Life is dynamic and never static so why should our experiences be limited to someone else's imagination or design?

Our favorite games may not be as “fluid” as the new generation or, the game just simply doesn't have the means because of its designed purpose. Regardless, once a game is completed is it time to move on?

With this guide and many others that will follow, I truly hope you'll find hours, days, weeks or even years of roleplaying ideas and experiences. Imagine creating a roleplay that fits so well with the game that it would be so amazing to share with the community. A great replaying experience might bring RIP games back to life, attracting new and returning players back to the game….

Note : I highly recommend reading the entire guide before starting to get the most out of your experiences. You can also use what you learn from this guide and try to adapt it to other games.

Remember : Always share your ideas and guides to the community

Let’s give new life to our favorite games and let the nostalgia sink in!

What is the narrative?

In this roleplaying experience you'll be playing The Elder Scrolls : Skyrim, any edition will do as long as they support the mods mentioned in this guide.

Your story begins with a soul—your soul and the many others you shall claim—for Honor, Vengeance, Glory, and Debts…

You were once a powerful warlord that was an ever growing threat to all the holds in Skyrim. One day you were struck down during battle from a powerful warlock leading the Forsworn onslaught. The warlock trapped your soul with a stab into the heart and a sword enchanted with daedraic magic.

Your soul is ensnared within the Soul Cairn, destined to be trapped forever but your ambitions still run a flame, vengeance shall be yours at any costs….

With rage and anguish, you make a deal with Durnehviir and once again rise as a powerful Dark Soul Hunter devouring all of your enemies. You return to Durnehviir satisfied and ready to repay your well spent debt….

Durnehviir has many other “clients” who once took his powers in exchange for service as well. However, they're not as willing as you are to satisfy their outstanding balance….

Collect the amount of souls Durnehviir wishes and become his new champion. Together you shall rule all of Skyrim!!!

In addition, with an Ai Chatbot of your choice the Ai will become your personal Game Master (GM) and help manage the entire experience as you play along in the actual video game. You can request the AI to roleplay as a character and engage in a conversation, generate quests, manage promotions etc throughout the roleplay.

Note : Ai Chatbots are currently NOT able to manipulate any aspect of the game for example, adding objects to the game world, adding items to inventory, Adding Dialogue

options or game mechanics, etc. Everything in this guide is pure speculation and imagination…. 🤔 💭 🦄

Things to Consider,

This guide assumes that you have Skyrim for PC, can use mods and console commands. If you don't, having a save game file with the Soul Cairn portal open and Durnehviir defeated or at least the Alternate Start mod would be MOST helpful.

It can get tedious but, I think it's still a rewarding experience…. 🙂

Recommended Mods,

The world would not be the same without these mods, some are deemed necessary while others bring optional enhancements.

⚠️ Warning : ⚠️

Using mods, Console Commands or killing NPCs WILL break your game, making achievements, quests and other legitimate stats unattainable…. ALWAYS make sure to back up your saves!!!

Disclaimer : I DO NOT own any of the mods listed in ALL of my guides. They are owned and operated by their respectful Authors and Contributors….

Optional Mods : Not required but offers more immersion….

1. **Skyrim Unbound (Alternate Start) :** In case you want to start with a completely new game file, highly recommend it. (https://www.nexusmods.com/skyrim/mods/98850)

2. **After Life Resurrected (SE Only) :** A must have mod that will send the NPCs you soul trapped to the Soul Cairn but unfortunately only works for the Special Edition for now…. https://www.nexusmods.com/skyrimspecialedition/mods/55051

3. **The Soul Cage (SE Only) :** A great mod for those with the Special Edition. It adds a player home to the Soul Cairn and you can teleport there. https://www.nexusmods.com/skyrimspecialedition/mods/61000

4. **Everyone Dies :** No one is safe from your wrath! (https://www.nexusmods.com/skyrim/mods/75446)

5. **Immersive College of Winterhold :** This mod will add lots of cool features to the college, especially for the Midden areas if you plan on trespassing…. (https://www.nexusmods.com/skyrim/mods/36849)

6. **Unlimited Hostile Encounters :** Allows the game to populate with more mobs so you won't feel so alone, and can be helpful when needing to spawn a specific creature. (https://www.nexusmods.com/skyrim/mods/111695)

7. **Enhanced Soultrap :** Gives you options to change how souls are being stored, etc. (https://www.nexusmods.com/skyrim/mods/71073)

8. **Soul Hunter - Craft and convert Soul Gems :** Allows you to craft all types of soul gems which can and will be helpful…. (https://www.nexusmods.com/skyrim/mods/48029)

9. **Teleportation Spell and Mark and Recall Spell :** Very important so you don't have to always console command or use fast travel. (https://www.nexusmods.com/skyrim/mods/14947?tab=images)

10. **Better Vampires :** Most important if you want to have generic dark powers and wish to take damage from sunlight. (https://www.nexusmods.com/skyrim/mods/9717)

11. **Sokco's Guild Starter :** In case you wish to have minions…. (https://www.nexusmods.com/skyrim/mods/52871)

12. **Follow Me Spell :** Most important for having your guild members follow and assist you. (https://www.nexusmods.com/skyrim/mods/53295)

13. **Immersive Citizens Ai Overhaul :** Makes humans more natural and travel more. (https://www.nexusmods.com/skyrim/mods/65013)

Getting Started,

The BEST way to start this roleplay is by creating a new game using an Alternate Start mod.

If NOT, a save game file of a bow/sneak with magic type of build would be recommended.

Completing the Dawnguard storyline is NOT necessary as long as you have the portal to the Soul Cairn open and have defeated Durnehviir.

Note : If you're using mods or PC console commands you can simply teleport to and from the Soul Cairn. coc DLCSoulCairnOrigin

Continuing forward, the Soul Hunter is an entity that has no emotions. Whether it be in blood or souls, the Soul Hunter's only thrill comes from taking the power of others and satisfying their hunger. They possess skills in Archery, Conjuration, Illusion, Alteration and Sneak. I recommend the following options to build your Soul Hunter but, you can completely customize your character to one's liking….

Note : If you're planning to use PC console commands, you can ask the AI chatbot to give you the console command code to add any items with enchantments or for other tasks as well.
(Chatbot might make mistakes…. 😐)

Character Build Options
(Using Mods/Console Commands)

1. In the MCM menu for alternate start mod, give yourself vampirism and any spells you wish. I recommend soul bound items, raising dead, etc or you can use the default spells provided by the Better Vampires mod.

2. Use the following commands to make the Soul Hunter friendly to all undead and dark creatures, including the undead from the Soul Cairn.

    a. **Skeletons:**
    player.addfac 0002D1DF 1

    b. **Undead (Draugr, etc.):** player.addfac 0002430D 1

    c. **Skeevers:**

player.addfac 000330B1 1

d. **Spiders:**
player.addfac 0002997F 1

e. **Necromancers:**
player.addfac 00034B74 1

3. Use the console command to give yourself all Nightingale armor and daedraic weapons. They'll be enchanted with Soul Trap in case you wish NOT to rely on bounded weapons.

    a. **Daedraic Bow (Soul Trap) :** player.additem 0001dff5 1

    b. **1H Daedraic Sword (Soul Trap) :**
    player.additem 0002950e 1

    c. **Daedraic Arrows :**
    player.additem 000139C0 100

    d. **Boots :**
    player.additem 000FCC0C 1

    e. **Armor :**
    player.additem 000FCC0E 1

    f. **Gloves :**
    player.additem 000FCC10 1

    g. **Hood :**
    player.additem 000FCC12 1

4. You can also give yourself the “Soul Stealer” perk to give bounded weapons Soul Trap with this console command.
player.addperk 000d799e

5. Don't forget to add any teleport spells, such as the Teleportation mod mentioned in this guide.

Player.addspell 14000d64
Player.addspell 140004932

NOTE : Teleport, mark and recall spells do not work inside the soul Cairn, you have to go to Valerica's Study.

Note 2 : Use the MCM menu so you can unlock all locations and tweak any settings you wish.

6. Next “coc” or teleport to the Soul Cairn using mods or PC console commands.
   coc DLC01SoulCairnOrigin

7. Once inside the Soul Cairn, save your game before proceeding forward.

8. spawn Durnehviir using the following console command….
   player.placeatme 0200c71a 1

   Note : If this command code doesn't work try typing help Durnehviir 4 in the console command window. There are 2 versions, one version spawns Durnehviir but he will attack you. The correct version acts like the summon Durnehviir spell and will fly around almost indefinitely.
   (Once you find the right code you may want to keep it for future reference.)

9. Once you've summoned Durnehviir you can make any final adjustments you wish and then create a replayable “Master” save game file by using the
   Save < your desired name > command.

10. Proceed with the rest of this guide before beginning.

Character Build Options
(Using Absolutely Nothing….)

If you plan on playing Skyrim in its most purest form, you should consider setting things up before proceeding….

1. Make sure you've progressed far enough to at least have the portal to the Soul Cairn open and have defeated Durnehviir.

2. Check your inventory, etc and make all the adjustments you wish to your character. Overall appearance, skillsets, spells, etc. Make sure you have absolutely everything you need before the next step….

3. Fast Travel to Valerika's study and head inside the Soul Cairn.

4. Head to the shout stone where Durnehviir is perched on.

5. Save your game and then proceed with the rest of this guide before beginning.

Once all is set and done, please upload this document file with the Ai Chatbot of your choice. The AI Chatbot should be able to initialize the roleplay and become your personal Game Master. If NOT, simply copy & paste the 'AI Chat Prompt' below.

The Ai Chatbot will then provide you with more detailed information including overall rules and character development. The Ai Chatbot will be more than happy to answer any of your questions as well.

The beauty of this prompt is that you can either choose to play the entire roleplay as a just only-text-based game with generated pictures as an option, or follow along in the actual game as you input your decisions….

Note : This roleplaying experience was tested using ONLY the free versions of Chatgpt and Grok. Results may vary, especially when using different models, subscriptions etc.

Ai Chat Prompt

Be my Game Master (GM) for The Elder Scrolls Skyrim and generate a roleplaying experience that I can follow along in the actual video game. I shall roleplay as a warlord defeated in battle and their soul trapped by a Forsworn Warlock leader. In the Soul Cairn I made a deal with Durnehviir to spawn my body back to Skyrim as a cursed Shadow Hunter devouring all of my enemies.

My vengeance now complete, I return to Durnehviir ready and eager to repay my most well spent debt. I must capture souls until Durnehviir is satisfied with an X amount of Total Charge Capacity (TCC). I can capture the souls of random NPCs if I wish but Durnehviir has clients whose souls are worth more than regular humanoid souls. As my GM you will start by asking me which of the following game modes to play….

Total Charge Capacity Difficulty Chart

1. Easy = 10,000
2. Normal = 50,000
3. Hard = 100,000
4. Custom = I choose my own TCC.

Once I've chosen a mode the GM will then instruct me to start at the Soul Cairn, I can use the console command "coc dlc01soulcairnorigin" to teleport there directly. I should go to the shout stone located on the left hand side of the castle entrance. The GM shall provide me with the console command to learn the "Summon Durnehviir" spell just in case he's not there.

Note : I highly recommend using the "Teleportation Spell and Mark and Recall Spell" mod to quickly fast travel to places with a nice lure friendly animation.

After confirming I'm with Durnehviir in the Soul Cairn the GM will then roleplay as Durnehviir and then generate 5 contract quests to steal the souls of 5 NPCs that the GM will decide upon with their TCC levels as well.

Note : I can request the GM to generate 5 new quest contracts at any time and provide information on console commands.

Note 2 : Use ONLY actual items, NPCs, etc that are found within the game.

Note 3 : I can request the GM to generate a table with the various charge capacities of soulshards and creatures also, provide a link to the website with complete information.

Lastly, once I've acquired all the TCC necessary. I must go back to Durnehviir and give him all the soul shards in order to complete this roleplay successfully. I can then be free to do what I wish, maybe go back to Skyrim and finish dominating its people with Durnehviir by my side….

Otherwise, let's begin! 🐉⚔️🏰💀👑

End of Chat Prompt

Tips & Tricks,

After playing through this roleplay myself, I came across a few details that might help you set things up and can get the most out of your roleplaying experience….

1. You can add all filled soul stones into the chest near the shout stone so Durnehviir can receive your souls and add it to your TCC.

2. If you acquire Azura's Star or the Black Star you must return to Durnehviir or the shout stone and charge a random item in order for Durnehviir to “receive” the soul and add it to your TCC.

3. If your soul trap doesn't work properly for some reason then you can keep track using notes unfortunately.... I had to do the same for some NPCs.

4. Taking notes is very important, always keep track of things and let the GM know about important information to keep the Chatbot updated.

5. The BEST way to have your guild members follow you with sneak/weapons is….

    a. Have them follow you using Sokco's Guild Starter dialogue setting when you speak to a member.

    b. Then cast the ‘follow’ spell from the Follow Me Mod.

    c. Simply chat with the companion to dismiss through dialogue and use the ‘follow’ spell again to dismiss them.

6. If you're using the Teleportation mod you can hold the charge of the spell until the menu pops up and then use coc commands to travel to any destination that's not available. You will still have the “Teleportation” spell like animation effects which makes it seamless….

7. Unfortunately at the time of writing this guide, the author who created the famous After Life mod has made their project Vanilla Skyrim LE version “hidden” stating it needs a full rework….

   If the mod appears again I highly recommend it so every time you soul trap an NPC you will see them in the Soul Cairn as a ghost.
   https://www.nexusmods.com/skyrim/mods/88401

8. Remember, you can always change and personalize your roleplaying experience and don't have to follow everything to the teeth. Simply tell the GM and it will adapt to your wants….

9. Sometimes it's best to respond ahead with a few prompts so that you don't spend too much time with the Ai Chatbot.

Final Thoughts,

Our games may be limited but our imagination isn't. In this golden age of technology and AI, one can roleplay in depths that are either too tedious to manage or simply impossible for one person to keep track of. Generating dialogue, investing/trading and other information plus a human mind deciding on the next courses of action is the heart and soul of these roleplays.

In the future, I hope my website and community will become the next GitHub for roleplaying research and development.

Thank you for participating, please feel free to leave feedback on my platforms!
